PROJECTS

[Wordle Clone](#)

HTML5, CSS3, React JS, Google Fonts API, UI/UX Design, Firebase, Yarn

- Developed a Wordle Clone in React illustrating design principles containing a clean user interface.
- Inserted a wordbank to test words, added functionality for custom words, and a login via Firebase.
- Implemented a live scoreboard to demonstrate points gained for correct words.

[2D Bouncing Game](#)

Python, PyGame, Repl.it, Bash

- Created a 2D ball game in Python where the player attempts to keep a ball in the air.
- Customized in PyGame, a game library with essential game modules for sounds and interactivity.

WORK EXPERIENCE

Focus Your Ideas (FYI inc)

Software Engineering Intern

- Interned at FYI, an app startup created by a member of the Black Eyed Peas, will.i.am.
- Overhauled the Zendesk Customer Support Page for FYI's public application launch.
- Integrated QA tests for the site and published working code onto the codebase.
- Enhanced workflow for thousands of users by overriding graphical elements for a better UI.
- Utilized JIRA to document and track software bugs and issues in order to maintain app quality.
- Underwent the Software Development Life Cycle for monthly deliverables directly from the PM.

Hollywood, CA

Jan 2023 - Present

East Los Angeles College (ELAC)

Quality Assurance Intern

- Organized and inspected Arduino hardware and software to ensure quality assurance.
- Enhanced the UI for the IT departments website and fixed visual bugs.

Monterey Park, CA

Mar 2021 - Aug 2021

National Aeronautics and Space Administration (NASA)

L'SPACE Project Manager

- Collaborated with a team of PMs to manage tasks and tickets using Trello and Slack.
- Implemented the Waterfall methodology by creating Gantt Charts for tracking progress.
